

Let it Grow

What helps everything grow?

Key Vocabulary	
Germination	When the conditions are right, the seed soaks up water and swells, and the tiny new plant bursts out of its shell. This is called germination.
Wild plant	A wild plant seed grows where it falls. It doesn't need to be planted or cared for as it grows.
Garden plants	Garden plants are plants that people choose to grow in their gardens.
Deciduous	A deciduous tree loses its leaves each year.
Evergreen	An evergreen tree keeps its green leaves all year round, even in the winter
Roots	Roots take in water and nutrients from the soil and keep the plant in the ground.
Stem	The stem holds the plant up and carries the water and nutrients from the roots to the leaves and flowers.
Leaves	Leaves catch sunlight to help the plant to make its own food.
Flower	Flowers attract insects and birds.
petals	Petals are the colourful part of the flower.

Which Communities Might I Belong to?

My family

My school

My class

A club
